INFO@ABQHOSPITAL.COM | ABQHOSPITAL.COM

Albuquerque ER & Hospital has created a medical experience that patients dream of: bringing quick, courteous, and compassionate emergency care to the local community. It's a simple idea—and it's also quite revolutionary.

With an inclusive, state-of-the-art facility built to provide comprehensive medical care, Albuquerque ER & Hospital treats a wide variety of injuries and ailments. Whether you need imaging for a broken bone or testing for an infection, residents of Albuquerque and surrounding communities can count on Albuquerque ER's team of expert staff and physicians to deliver the emergency care you deserve.

Albuquerque ER & Hospital was founded by physicians frustrated by the current state of emergency care. They sought to solve the issues typical of large, congested hospitals by crafting a signature brand of inclusive and compassionate emergency care. And their plan worked: our team has the highest-rated ER patient care (and shortest ER wait time) in the city.

At Albuquerque ER & Hospital, patients have immediate access to some of the best physicians, nurses, and support staff available—all working together to offer unparalleled care in a calming, upscale setting with a peaceful, welcoming atmosphere. The team of healthcare professionals at Albuquerque ER & Hospital strives to see and treat patients as rapidly as possible, often providing essential care much faster than other hospitals.

Meanwhile, patients who require longer stays do so in spacious, comfortable, amenity-filled rooms. And in early 2023, we will open our second location (at the corner of Montgomery Boulevard and Wyoming Boulevard), offering the same services: micro hospital with ER and inpatient beds, plus full radiology services with MRI, US, CT and X-ray scans.

BettER. FastER. SmartER. No matter the injury or illness, Albuquerque ER & Hospital is fully equipped to treat you and your loved ones.
